

Line

This page is a step-by-step guide for the process of opening and setting up an external application in LINE as part of the [Gigya Setup](#) process.

Note: If your site is defined under one of Gigya's non-US data centers, replace domain references to "*socialize.gigya.com*" (or "*socialize.us1.gigya.com*") with **`https://socialize.<data_center>/`**

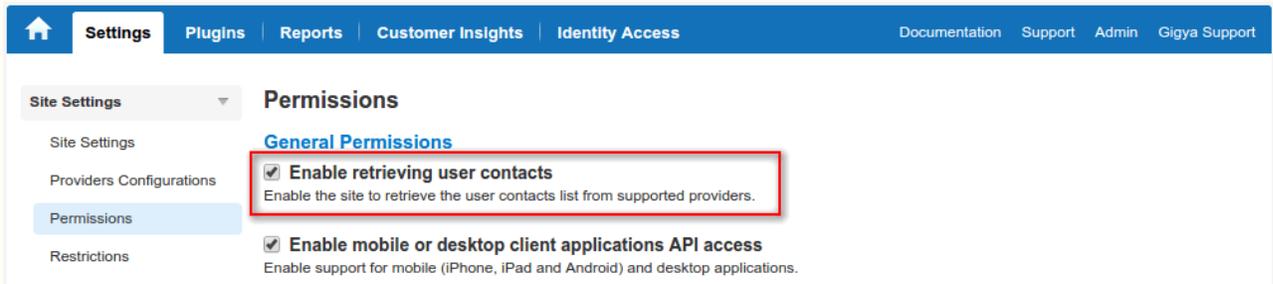

Where `<Data_Center>` is:

- `us1.gigya.com` - For the US data center.
- `eu1.gigya.com` - For the European data center.
- `au1.gigya.com` - For the Australian data center.
- `ru1.gigya.com` - For the Russian data center.
- `cn1.gigya-api.cn` - For the Chinese data center.

If you are not sure of your site's data center, see [Finding Your Data Center](#).

Domain references are defined in Gigya's [dashboard](#), externally in social network app definition pages, and when using Gigya's SDKs to set the domain (in particular the `APIDomain` field in `class GSRequest`).

When using any 3rd Party Apps with Gigya, it is important to ensure that you **Enable retrieving user contacts** from the [Permissions](#) page of the [Console](#) prior to making your app live. This enables the user's contacts retrieval from providers that don't consider this an elevated permission.

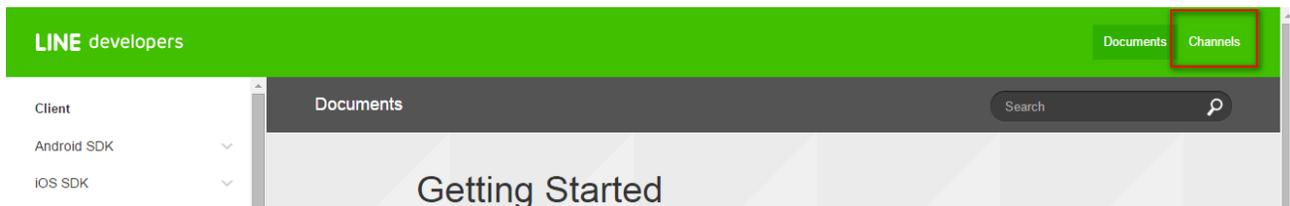

Phase 1 - Creating Your Application In LINE

You must be a LINE Partner in order to create an application. You can apply to become a Partner [here](#).

Optional: If you are planning on [configuring a domain alias \(CNAME\)](#), please insert your alias subdomain (CNAME value) instead of '*socialize.gigya.com*' and your domain instead of Gigya's domain. i.e., `https://[YOUR-ALIAS-SUB-DOMAIN].yoursite.com/GS/GSLogin.aspx` in the **Authorized Redirect URLs** field of the Authentication page.

1. Log into LINE by going to <https://developers.line.me> and click the **Channels** button in the top right-hand corner of the page.

2. You will be directed to the login page.

LINE

Please enter the details registered to your LINE account.

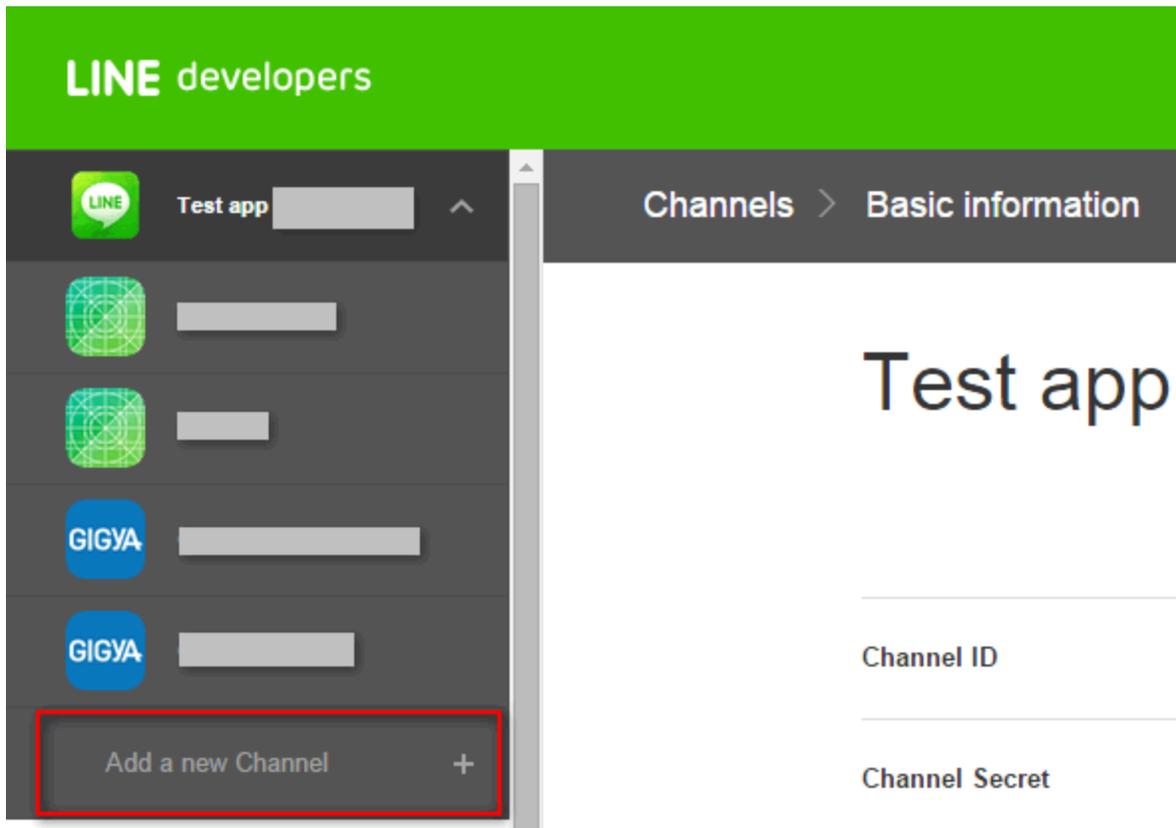

Login

You can check your account info by starting the LINE app and going to [Settings] > [Accounts].

[About LINE](#)

© LINE Corporation

3. Once logged in, click the Channels button from Step 1 again.
Here you will be able to access any existing apps and create new ones.
4. Click Add a new Channel from the top left-hand menu.

5. Complete the following fields:
- Name
 - Description
 - Select the Application type
 - NATIVE_APP
 - WEB

Important: Gigya currently only supports **Application Type: WEB** by default. If you are developing a Native App see the relative documentation for your platform: - iOS: [Adding LINE Native Login](#) - Android: [Adding LINE Native Login](#)

- Application icon
 - Large (256x256 px)
 - Thumbnail (80x80 px)
- Allowed permissions
 - These are the permissions you were approved for at the Partner level and are not editable on a per-application basis.

Important: Gigya currently only supports **Allowed Permissions: PROFILE**. If your account is approved for permissions higher than Profile (i.e., Friends), it may not work correctly.

- Provider
 - This is the Provider selected at the Partner level and is not editable on a per-application basis.
- Partner
 - This is the Partner selected at the Partner level and is not editable on a per-application basis.
- Status
 - This is the current Status of the app and is not editable until after the application is created.
- Contact mailing list address
- Expected release date

SAVE

6. After clicking **Save** you will be returned to the app page and see the following notice.

Documentation Application 0001

Notice

This Channel is still being edited and has not been reviewed. The items being edited are highlighted in **green**.

EDIT

7. At the bottom of the page there is now a Submit button that you need to press to complete the process.

This Channel is still being edited and has not been reviewed.
If you would like to submit your Channel's information for review, click **SUBMIT**.

SUBMIT

8. Once you click the Submit button you will be presented with a popup:

Submit for review

Comment [?]

Submission Files [?]

Screenshots of login screen [?]

Expected Release Date

9. Fill in the comment section and press Submit.
10. If you did not incur any errors your app will now be created, however, you will need to return to the Channels page to view the app out of 'Review' status.

Phase 2 - Additional LINE Configuration

When selecting your new app from the top left-hand menu of the **Channels** page on the LINE website you will now be able to edit additional configurations.

Basic Information

Navigating to the **Basic information** tab you will be able to retrieve your **Channel ID** and **Channel Secret**, which will be needed in **Phase 3 - Configuring LINE's Application in Giga's Console**.

The screenshot shows the LINE developers console interface. At the top, there is a green header with 'LINE developers' on the left and 'Documents' and 'Channels' on the right. Below the header, there is a dark grey navigation bar with 'Documentation Application 0001' on the left and 'Channels > Basic information' in the center. The main content area is divided into a left sidebar and a main panel. The sidebar contains a list of navigation items: 'Basic information' (highlighted in green), 'Technical configuration', 'Roles', 'View statistics', 'update password', 'logout', 'Terms of Use', 'LINE Corp', 'LINE', and 'Contacts'. The main panel displays the title 'Documentation Application 0001' in large font. Below the title, there are two buttons: 'History' and 'EDIT'. The main panel also contains a table of application details:

Channel ID	[Redacted]
Channel Secret	[Redacted]
Name (English)	Documentation Application 0001
Description (English)	Application for Giga Developers Documentation.
Application type	WEB
App icon (PNG Only 256x256)	[Placeholder]

Technical Configuration

In the **Technical configuration** tab you will see the specifications of your app.

The **Technical configuration** tab is where you will define your **Authorized Redirect URL's** using the **Edit** button and entering them one per line.

If you are using a **CName**, be sure to include the correct URI in this field. The below screenshot is just an example.

Redirect URI format:

- `https://socialize.<data_center>/GS/GSLogin.aspx`
- `<CNAME>/GS/GSLogin.aspx`

View Statistics

On the View statistics tab you can view the specific stats for your app within a given time frame.

The screenshot shows the 'View statistics' interface for 'Documentation Application 0001'. The top navigation bar is green with 'LINE developers' on the left and 'Documents' and 'Channels' on the right. Below this, a dark grey bar contains 'Documentation Application 0001' and 'Channels > View statistics'. A left-hand menu lists 'Basic information', 'Technical configuration', 'Roles', and 'View statistics' (highlighted in green). The main content area features a 'Channel Approval' box, a search filter with dropdowns for 'By Region', 'Region - ALL', 'Application type - ALL', 'Daily', a date field '2015-9-24', and a '7' dropdown. Below the filters are 'CSV file download' and 'SUBMIT' buttons. A message at the bottom reads 'No Data. Please confirm search conditions.'

Development Of Your App

While your app is in **Development** status, you add users via the **Roles** tab described above, in order for them to have access to the app.

Once you move the Status of your app to PUBLISHED (described [below](#)) it will become Live and visible/usable to all.

Moving Your App To Production

1. When the development mode of your application is complete, login to your LINE account and return to the Channels section as described [above](#).
2. Navigate to the particular app you want to move to production from the left-hand menu (if you have more than one).
3. Press the **EDIT** button.

DELETED

5. Once changed, press the **SAVE** button. Your app is now live.

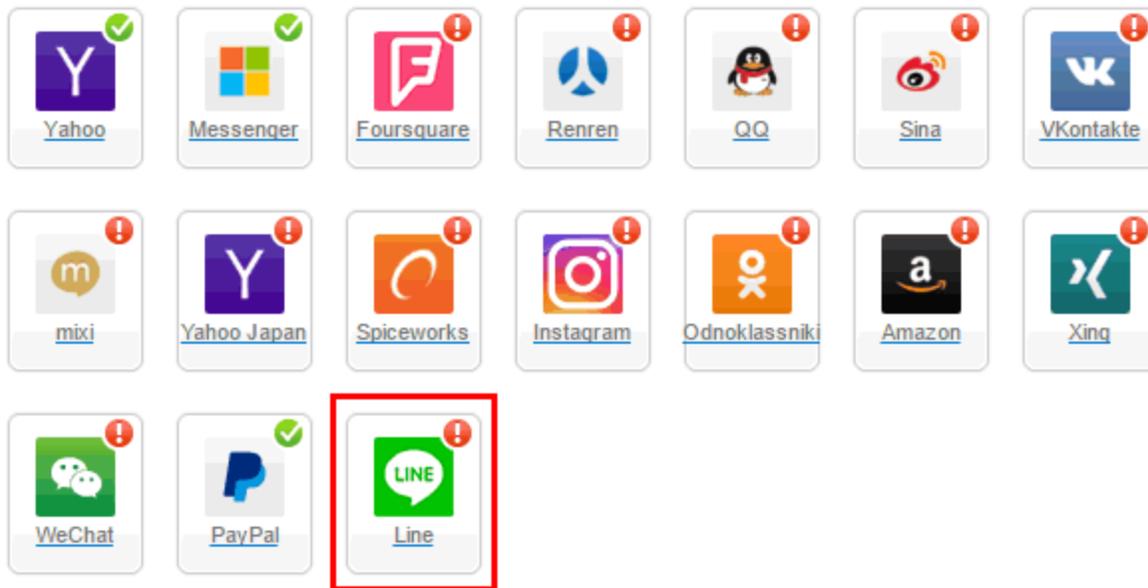

Phase 3 - Configuring Line's Application Keys in Gigya's Console

1. Open the [Providers Configuration](#) page of Gigya's Console.
2. Select **Line** from the list of providers.

Main Social Networks

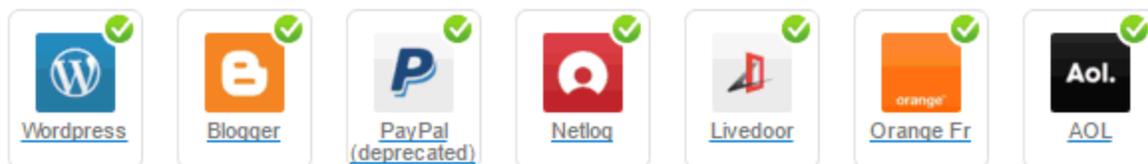

More

Providers that don't Require Configuration

Enable CNAME for all OpenID providers

3. Paste the **Channel ID** and **Channel Secret** from the beginning of Phase 2 in to the corresponding fields.
4. Select **Secure redirects only** to allow only HTTPS redirects from Line.
5. Click **OK** and then click **Save Settings** on the lower right-hand corner.

That's it, Line configuration is complete! Please note that it can take up to 10 minutes for any changes to synchronize with LINE.

Additional Information

When using LINE as a login provider via `socialize.login` or `accounts.showScreenSet` on a mobile device, only authflow 'redirect' is supported, e.g.,

```
var params = {
  provider: 'line',
  callback: onLogin,
  authFlow: 'redirect'
};
gigya.socialize.login(params);
```
