# Xing

Description

This page is a step-by-step guide for the process of opening and setting up an external application in XING as part of the Gigya Setup process.

> When using any 3rd Party Apps with Gigya, it is important to ensure that you **Enable retrieving user contacts** from the Permissions page of the Console prior to making your app live. This enables the user's contacts retrieval from providers that don't consider this an elevated permission.
>
>
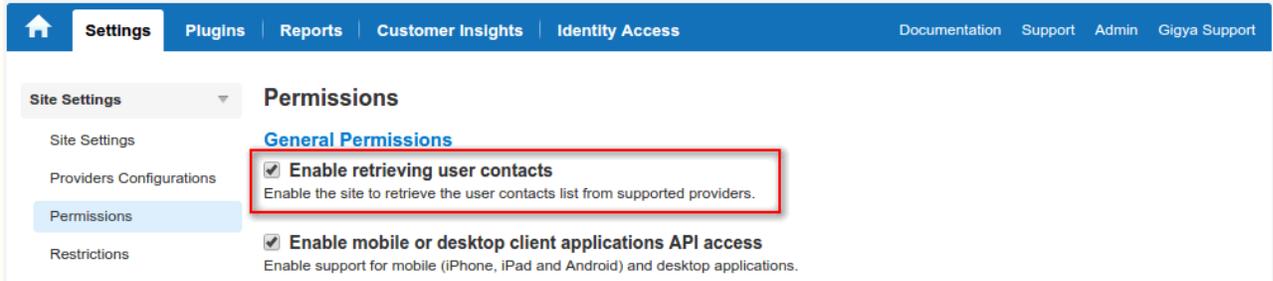

Phase 1 - Opening the Application in LinkedIn

1. Enter the following link: https://dev.xing.com/ and log in via "My Apps".

2. Press "+Creat App".
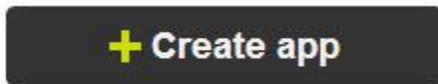

3. Edit the app name via "Change app name".

4. By now you'll get a default Consumer key & secret, you can test with. However, you'll need to complete the registration for production usage.

5. Press "Get a production key"

6. Fill-in the different sections: Access rights, App details, Developer details, Company details & OAuth details, as follows:
   - Access rights: choose the relevant access rights your app will request. Xing advises to only choose the minimal rights you require.

/ 1 Access rights

Please only select the access rights that you really need for your application. If you request too many rights your application may not be well received by users.

- ☐ Profile message ⓘ
- ☐ Search user by email ⓘ
- ☐ Share link ⓘ
- ☐ Status message ⓘ
- ☑ Users ⓘ

- Developer and company details: please make sure that the address is correct and valid, as Xing sends the pin code by mail.

- App details: please set "Type of app" field to be "Web":

Type of app * `Web` ▾

- OAuth details: enter the callback domain or mark that you don't want to use it. Gigya's default app doesn't use a callback domain.

/ 5 OAuth details

☑ I don't want to use a callback domain. ⓘ

Callback domain `http://example.org` ⓘ

- Confirm the terms and conditions, and press the "Get a production key" button.

/ 6 Confirm Terms and Conditions

☑ I have read and accept the XING API Terms & Conditions *

Get production key

7. Xing needs to approve now the content you have entered. After which, Xing sends 2 security pins: one by email and one by mail. Once they were received, enter them to get Xing's production key & secret.
8. Copy the "API Key" and "Secret Key" (you will need to paste them in Gigya's website, as described in phase 2).

Phase 2 - Configuring Xing's Application Keys in Gigya's Website

1. Log into your Gigya account and go to the Providers Configurations page of Gigya's Console.
2. Click on **Xing** to open its configuration window.

Main Social Networks

Yahoo Messenger Foursquare Renren QQ Sina VKontakte

mixi Yahoo Japan Spiceworks Instagram Odnoklassniki Amazon Xing

WeChat PayPal Line

Providers that don't Require Configuration

☐ Enable CNAME for all OpenID providers

Wordpress Blogger PayPal (deprecated) Netlog Livedoor Orange Fr AOL

3. Paste your keys (the "API Key" and the "Secret Key" from the end of phase 1) in the corresponding places.
4. Select **Secure redirects only** to allow only HTTPS redirects from Xing.
5. Click **OK**, then **Save Settings**.

That's it, Xing is configuration is complete! Please note that it might take up to 10 minutes for our system to become synchronized.
