

# Class GSResponse Python

## Description

Wraps Gigya server's response.

## Method Summary

Method	Description
JSON object	<b>getData()</b> Returns the response data. Please refer to the <a href="#">REST API reference</a> , for a list of response data structure per method. Note: If the request was sent with the <i>format</i> parameter set to "xml", the <i>getData()</i> will return null and you should use <i>getResponseText()</i> .
integer	<b>getErrorCode()</b> Returns the result code of the operation. Code '0' indicates success, any other number indicates failure. For complete details, see the <a href="#">REST API reference</a> .
string	<b>getErrorMessage()</b> Returns a short textual description of an error, associated with the errorCode, for logging purposes.
string	<b>getLog()</b> Returns a log of the operation for debugging purpose. The format of the log is:  <pre>apiMethod=chat.getMessages, apiKey=2_DJDxNTrvx_QC313MDs_6Byos-ua1IHs5S1-fH32d-MznZn-gLccOid6lYt1D2f26, params={'httpStatusCodes': 'false', 'format': 'json', 'UID': '_gid_Byg78TU2dp47Wilmn7t3UA==', 'categoryID': '44474105%261%3Dfalse%26nonce%3D1369740195612486%26timestamp%3D1369740195, URL=http://chat.gigya.com/chat.getMessages, postData=nonce=1369740195612486&amp;httpStatusCodes=false&amp;UID=_gid_Byg78TU2dp47Wilmn7t3UA%3D%3D&amp; &amp;apiKey=2_DJDxNTrvx_QC313MDs_6Byos-ua1IHs5S1-fH32d-MznZn-gLccOid6lYt1D2f26&amp;sig=DMDsauUzETP5 responseText={   "next":1369740288341,   "publicMessages":[],   "privateMessages":[],   "callId":"18b8599538064f93ac862aa9cdc93749",   "errorCode":0,   "errorMessage":"" }</pre>
string	<b>getResponseText()</b> The raw response data. The raw response data is in JSON format, by default. If the request was sent with the <i>format</i> parameter set to "xml", the raw response data will be in XML format.
JSON object	<b>getObject(string key)</b> Type specific methods for retrieving value by key. If the key is not found, and there is no default value, the method will return null.
