

RenRen

This page is a step-by-step guide for the process of opening and setting up an external application in RenRen as part of the [Gigya Setup](#) process.

Customers should note that RenRen app approval takes a number of days. If your app is not approved within 10 days of submission, then contact your Implementation Consultant.

When using any 3rd Party Apps with Gigya, it is important to ensure that you **Enable retrieving user contacts** from the [Permissions](#) page of the [Console](#) prior to making your app live. This enables the user's contacts retrieval from providers that don't consider this an elevated permission.

Phase 1 - Opening an External Application in RenRen

1. Login to your Renren account.
2. Go to the following URL: <http://dev.renren.com/app> .
3. To show your existing apps, click the right-hand link in the navigation bar.
4. To create a new app, click the top right-most button (with the plus (+) symbol).

5. Enter the app name, set the category (education, entertainment, game, tool) and sub-category, root domain, app description, short description and key words.
Enter an icon for your app.
Check the two boxes showing you accept the developer's agreement and license agreement.
Click the blue button.

6. Select the second option on the left and then click the third plus sign.

7. Enter your domain name (<http://www.domainname.com>) and then click the blue button to request that RenRen approve your app. Note that approval may take a day.

8. If required, the third option in the next screen (User Management), allows you to add test users who can access your application while it is being set-up and awaiting approval.

应用运营

1、应用处「设置中心」-「管理员」是应用初始应用的，而应用指定的管理员「应用处」
2、最多可添加20个测试用户，每个测试用户的好友数需小于10人，否则立即失效。
3、最多可添加5个管理员。
4、最多可添加10个开发者。
5、用户管理中至少要有一个管理员角色。
不同的用户角色会有不同的权限，详情请[点击这里](#)。

管理员

 
明胜

开发者

 这个应用还没添加开发者，点击“添加用户”进行开发者用户的添加。最多可以添加10个开发者用户。

测试用户

 若您的应用尚未通过审核，只能通过测试用户进行测试。请点击“添加用户”进行测试用户的添加。最多可以添加20个测试用户，每个测试用户的好友数需少于10个人，否则立即失效。

应用数据助手用户

 这个应用还没添加应用数据助手用户，点击“添加用户”进行应用数据助手用户的添加。

9. Enter operational contact information in the fourth option. The bottom boxes are company name, phone number, QQ (messenger) number, e-mail address.

运营信息

当前状态: 关闭

启用

You need to click this before you can write to the boxes. However it is only necessary if your app is undergoing maintenance.

⚠ 此选项主要适用于“站内应用”，开启维护状态时，将挂维护信息通知用户目前应用处于维护状态。开发者对已发布的应用进行维护时，必须提前与开放平台工作人员沟通确认相关维护信息。

10. RenRen requires proof of domain ownership for the app's domain:

- Open [myip.cn](#).
- Enter your domain name at the top of the page and press the *Inquiry* button on the right.

- 男友揉大了我的乳房
- 超级美少女，爱美偏执狂
- 美女白领夜夜偷偷看一小时
- 学会计(出纳)上岗必备教程

- Take a screenshot of the results generated. RenRen needs to see proof that you are the domain's registered owner. Your app will not go live until this has been provided (the example below shows some relevant information, however, if possible send a screenshot of the entire page).

域名 Whois 记录

- Send an email to shenhe@renren-inc.com, In the mail, explain that you are sending proof of domain registration as part of your RenRen setup and that the screenshot is of <http://www.myip.cn/<your-site.com>> (for example <http://www.myip.cn/gigya.com>).
- You will additionally, need to fill out the following 4 areas of your application, by clicking on the corresponding links (see image). The items you need to complete are:
 - Basic Personal Information
 - Company License and Software License
 - Payment Information (China based bank account or PayPal account).
 - OAuth redirect URLs.

- 11. If your site uses a Cname, check the box for the following section and enter your Cname in the field marked OAuth Authorize Callback URL.

提交

12. Once approved, you can find your app's API Key and secret by pressing the app's Name in the left-hand menu. You will need this information for the next phase.

Phase 2 - Configuring RenRen's Application Keys in Gigya's Website

1. Open the [Providers Configuration](#) page of Gigya's Console.
2. Select Renren from the list of providers.

Main Social Networks

More

Providers that don't Require Configuration

Enable CNAME for all OpenID providers

3. Paste your keys (the 'API Key' and the 'Secret Key' from phase 1) in the corresponding places.

Renren Configuration

Visit [Renren](#) for tutorials on setting up an application.
See our [Developer's Guide](#) for instructions on setting up an application.

API Key: *
Using test key

Secret Key: *
Using test key

_____ (optional) _____

Enable CName ?

Secure redirects only ?

OK

4. Select **Secure redirects only** to allow only HTTPS redirects from Renren.
5. Click **Save Settings** on the lower right-hand corner.

That's it, RenRen's configuration is complete! Please note that it might take up to 10 minutes for our system to become synchronized with RenRen.
