

Profile Management (IDS) REST

Description

Gigya's Profile Management (IDS) API consists of the methods listed below:

Note: If you plan on integrating Gigya's Profile Management (IDS), we highly recommend reading the [Identity Storage Guide](#). Profile Management (IDS) is a premium platform that requires separate activation. If it is not yet a part of your existing site package, please contact Gigya Support via the [Support](#) link in the top menu of your [Console Dashboard](#) or email support@gigya.com.
